OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) went through the seasonal ghost month phase exhibiting muted trading volumes. Average daily turnover plunged to Php5.91 billion, or 16% lower MoM from Php7.02 billion registered in the July. A slew of market events such as the underwhelming 2Q corporate earnings (which mostly came in line but lower average earnings) and geopolitical tensions over in Northeast Asia hampered market sentiment. The bellweather index dropped by 74 basis points to close at 7,958.57. Despite the listless trading month, foreigners continued to be net buyers, registering US\$49.58 million.

Top gainers for the month were EDC (+13.57%), SECB (+6.84%) and AC (+6.36%) while detractors include RLC (-9.73%), JGS (-9.69%), and URC (-9.25%).

Key Economic Developments:

- The Philippine economic growth (GDP) rose by 6.5% in 2Q2017, better than consensus estimates of 6.4%. This was mainly driven by government consumption which increased by 7.1% after coming out of a flat performance in 1Q2017. Private consumption, meanwhile, rose 5.9%.
- Inflation registered for the month of July rose slightly to 2.8% YoY from 2.7% growth in June. Transport index was the main driver, growing by 3.8%.
- OFW remittances climbed 5.7% YoY to US\$2.47bn in June, pushing the 1H2017 figure to US\$13.81 billion. Land remittances from US rose 4.7% to US\$609 million while those from the Middle East rose 7.5% to US\$726 million.

Fund Performance. The Fund registered a return of -0.60% for the month of August, outperforming the benchmark by 14 bps. Year-to-date, the Fund registered 16.52% outperforming the benchmark by 18 bps.

Fund Strategy. The Fund will continue to track the performance of the Philippine Stock Exchange Composite Index (PSEi).
